## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 3-6, 8, 9, 1, 12, 14, 17, 19, 22-25, 27, 28, 30, 31, 33, 35, 36 and 38 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 7, 10, 13, 15, 16, 18, 20, 21, 26, 29, 32, 34 and 37 rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. (6,587,166) in view of Sasaki (JP 11086623).

Regarding Claims 1, 2, 7, 10, 13, 15, 16, 18, 20, 21, 26, 29, 32, 34 and 37, Lee et al. disclose a liquid crystal display module and an assembly method thereof where in Claim 10 it is disclose a mold frame comprising a lamp assembly receiving portion, an inverter supporting bar for supporting an inverter and in Claim 21 it is disclosed that a rear case has a bottom surface corresponding to the lamp assembly the gate PCB, the source PCB and the inverter. Lee et al. fail to disclose specifically that the inverter is electrically connected to the lamp/light. However, Sasaki discloses that a metal fitting electrically connects the fluorescent tube to the inverter unit.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required inverter/lamp assembly in Lee et al. as taught by Sasaki, in order to have a liquid crystal display device with better functionality.
